The Republican alternative to President Barack Obama's proposal to tax the super-rich is featured in full-page newspaper ads calling for a reduction in unemployment checks that Congress approved after the 9/11 terrorist attacks. The ads -- entitled "End The Blight" -- promise to cut the average unemployed person's unemployment check for four months, after which they would remain unemployed for an additional three months. "It makes some amount of sense for people who have been out of work for four months or longer," said Rep. Sue Myrick, R-N.C., a member of the House Budget Committee. She said the ads would be jointly funded by the AARP and the Republican National Committee. The ads ran in The Wall Street Journal, The Washington Post, The New York Times and The St. Louis Post-Dispatch. Republicans say they want to see the number of people collecting unemployment pay reduced because many have been unemployed longer than the six months Congress set as a maximum. In the ads, Republicans are stressing the unfairness of the Obama proposal to impose a top rate of 35 percent on people earning more than \$1 million a year. But, they point out, the people at the top "are making hundreds of millions of dollars" in stocks and other investments. "It's unfair to punish the same individuals who are getting a windfall from this economic crisis while at the same time hurting millions of Americans who are struggling to find jobs and feed their families," the GOP ads say. Myrick said she agreed with the GOP argument that people

at the top are getting a windfall while also working hard and smart enough to produce windfalls. "We need to make sure that the people on the bottom are having their unemployment checks as quickly as possible because they have been hit hardest by the uncertainty of this economy and its unprecedented nature," Myrick said 0cc13bf012
