A large number of people are downloading files from there. They know some of them are almost flawless, but others are not quite as good, so they come with a disclaimer - Skidrow Reloaded. This means the files are as good as the ones that come with the original game. And so, the reloaded edition is the one that the user will download. This is because there is no guarantee that the original files are intact, so if something were to go wrong with the download, the resulting files would be corrupted, probably not to the user's liking. However, a good way to check the quality is to look at the file size of the download. If it is much larger than the original, it means there are more files, and as such, it is likely to be a crack. However, it is usually best to go with the Skidrow Reloaded, even though you know the files are not as good as the originals. If you know someone who can play your game, they would be better off with the original files. x.
